City of Santa Monica®

# City Council Report

**City Council Meeting: July 26, 2016**
**Agenda Item: 9.A**

To: Mayor and City Council

From: Dean Kubani, Sustainability Manager, Office of Sustainability & the Environment

Subject: Public Hearing and Approval of the Stormwater Parcel Reports, and Stormwater Management User Fees and Clean Beaches and Ocean Parcel Taxes for Fiscal Year 2016-17

## Recommended Action

Staff recommends that the City Council hold a public hearing, receive public comment, and approve the proposed 2016 Stormwater Parcel Reports pursuant to the California Health and Safety Code, and Stormwater Management User Fees (unchanged) and Clean Beaches and Ocean Parcel Taxes (adjusted for inflation) for Fiscal Year 2016-17.

## Executive Summary

Each year, the City of Santa Monica produces two stormwater parcel fee reports listing each property in the City and the amount of the stormwater fees to be paid by each property owner. This information must be submitted by August 10 to the County of Los Angeles Tax Assessor for these fees to be incorporated into the county parcel tax bill. Adoption of the bill enables the City to receive its stormwater fees in the coming fiscal year. These fees support the City's Watershed Management Program.

The Stormwater Management User Fee, and the Clean Beaches and Oceans Parcel Tax (Measure V) generate approximately $4 million annually. These funds are critical to the City's ongoing watershed management program, enable the City to comply with federal and state water quality regulations, and support the City's Watershed Management Plan and the Sustainable City Plan.

The proposed 2016-17 Stormwater Management User Fee is $36 per Parcel Billing Unit (PBU). The proposed 2016-17 Clean Beaches and Ocean Parcel Tax is $99.29 per Basic Tax (BT).

## Background

*Stormwater Management User Fee*

On July 25, 1995 Council adopted an ordinance establishing the Stormwater

Management User Fee to support stormwater management activities. The Los Angeles

County Tax Auditor-Controller's Office is responsible for the collection of the annual fee, which is then forwarded to the City.

The stormwater management program consists of:

- Periodic upgrades to the storm drain system,
- Enforcement of local, State and Federal stormwater regulations, such as the City's Urban Runoff Pollution Prevention Ordinance (SMMC 7.10) and the Los Angeles County National Pollutant Discharge Elimination System (NPDES) permit,
- Implementation of the Santa Monica Bay Restoration Plan,
- Installation of Best Management Practices, which are structures aimed at reducing the volume and pollutant load of urban runoff flowing into Santa Monica Bay, and
- Operation and maintenance of the City's storm drain system and Best Management Practices.

*Clean Beaches and Ocean Parcel Tax*

In November 2006, the Clean Beaches and Ocean Parcel Tax was approved by Santa Monica voters for the purpose of implementing the City's Watershed Management Plan (Plan). The goals of the Plan are to reduce urban runoff pollution; reduce urban flooding; increase water use and conservation; increase recreational opportunities and open space; and increase wildlife and marine habitat. Revenues generated by this parcel tax can be used for operations and maintenance costs related to storm drainage systems, multipurpose capital improvement projects that improve the quality of urban runoff, and paying for any indebtedness incurred for these watershed protection purposes. Watershed management and pollution prevention activities of the Plan assist the City in complying with the Clean Water Act's National Pollutant Discharge Elimination System (NPDES) permit requirements, and new regulations promulgated by the Los Angeles Regional Water Quality Control Board relating to Total Maximum Daily Loads.

**Discussion**

The Stormwater Parcel Reports list all privately-owned parcels with their associated fees. The City must submit these reports to the Los Angeles County Auditor-Controller's Office by August 10, 2016, for inclusion on the 2016-17 tax rolls. However, a public hearing and Council approval are required prior to submittal. Notification regarding a public hearing was published in the Santa Monica Daily Press on July 2, 9, and 16, 2016. The 2016-17 Parcel Reports are also available for public review at the City Clerk's Office, Main Library and satellite libraries, and at the Office of Sustainability and the Environment website, specifically the Urban Runoff page.

The Stormwater Parcel Reports are based on the current parcel database available for calculating the number of Parcel Billing Units (PBU), used for the Stormwater Management User Fee, and the Basic Tax (BT), used for the Clean Beaches and Ocean Parcel Tax. PBUs and BTs are calculated based on land use, runoff factor, and parcel size, which are directly proportional to the amount of runoff generated by a given parcel.

The proposed 2016-17 Stormwater Management User Fee is $36 per PBU, which is the same rate since the original 1995 rate was instituted; the Stormwater Management User Fee is fixed. This rate has no annual Consumer Price Index (CPI) adjustment.

The proposed 2016-17 Clean Beaches and Ocean Parcel Tax is $99.29 per BT, which is $3.14 higher from the previous year ($96.15 per BT 2015) because the CPI increased 3.27% for the period February 2015 – January 2016. A CPI annual rate adjustment is included in section 7.64.040(e) of the voter approved Clean Beaches and Ocean Parcel Tax Act.

**Financial Impacts and Budget Actions**

Staff anticipates that the proposed Stormwater Parcel Fees would generate annual revenues of nearly $1.2 million; the proposed Clean Beaches and Ocean Parcel Taxes would generate annual revenues of nearly $3.1 million. Revenues are included in the

FY 2016-17 Adopted Budget at accounts 34661.405500 (Stormwater) and 06661.405490 (Clean Beaches).
